Herman Bakanin

Senior Full-Stack Developer · Web Applications & API Integrations

Tenerife, Spain · highsierraloft@gmail.com · cv.evquee.com
linkedin.com/in/herman-bakanin

Full-stack developer with 7+ years of experience delivering web applications and API integrations. I guide clients from requirements and architecture through release and maintenance. Seeking fully remote work.

PROFESSIONAL EXPERIENCE

Teide.tech Jun 2026 – Sep 2026

Senior Software Developer · Freelance contract

Client: Roche — Project deployment tools

- Turned client requirements into safeguards that block conflicting deployment actions before execution.
- Built a configuration comparison prototype covering stored fields, permissions, workflows, and tracker structures.

Qikbuild Jan 2024 – Sep 2026

Senior Software Developer · Freelance contract

- Built more than 10 client applications and designed technical architecture for five projects.

Client: Emerge Scholars — Student application (App Store · Google Play)

- Reworked a legacy Flutter app and backend integration in approximately three weeks, within a shared architecture.
- Clarified requirements with a non-technical client and maintained an app used by hundreds of U.S. students.

Client: Cysterhood — In-app shopping

- Delivered in-app shopping in two weeks, integrating React Native with existing WordPress and backend systems.
- Added shopping analytics and investigated device issues after release.

Self-Employed Jun 2023 – Jan 2024

Web Application Developer

- Delivered three client applications, including one product from concept through release.

Alacrity Canada Jun 2022 – May 2023

Web Developer

- Built new websites for businesses without an existing site and optimized client websites for search engines.

SmartOne May 2021 – May 2022

Front-End Developer

- Redesigned an Angular merchant portal in 10 days for a customer presentation.
- Built a shared UI library that supported the redesign and subsequent development.

FUIB Feb 2019 – Feb 2021

Angular Front-End Developer

- Built a reusable UI package for use across internal applications.
- Maintained backend services supporting financial processing.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, SQL, Java (about 6 months)
Frontend: React (about 5 years), Vue (3 years), Angular, HTML, CSS
Backend & data: Node.js, REST APIs, PostgreSQL, Firebase, Redis, Spring Boot
Delivery & quality: Git, Automated Testing, CI/CD, Docker, OpenAPI

EDUCATION

National Mining University Sep 2017 – Jul 2021

BSc Computer Science
