

Herman Bakanin

Senior Software Developer

📍 Spain ✉ highsierraloft@gmail.com

Professional Summary

Senior software developer with **7+ years of experience** taking web and mobile products from technical architecture through release. Recent work includes a Flutter app used by **hundreds of U.S. students** and **enterprise deployment tools for Roche**. My core stack is TypeScript, Vue, Angular, and Flutter, supported by backend and automation experience.

Professional Experience

- Teide.tech — Senior Software Developer

Freelance contract

📅 Jun 2026 – Present
- Roche — CLIENT · Project deployment tools

Java Spring Boot Python Groovy Codebeamer REST APIs PostgreSQL Docker Kubernetes

 - Develop tools that deploy project configurations and templates across Roche's Codebeamer environment, using Java and Spring Boot.
 - Built guards that block **conflicting deployment actions** before they can run.
 - Designed and built an engine that **compares stored project configurations**, including fields, permissions, workflows, and tracker structure, with repeatable results.
 - Added automated tests and deployment checks for shared workflows, and documented the reasons for key architecture decisions.
- Qikbuild — Senior Software Developer

Freelance contract

📅 Jan 2024 – Present
- Emerge Scholars — CLIENT · Flutter App

Flutter Dart Firebase REST APIs

 - Led the Flutter rewrite of the Emerge Scholars app for iOS and Android, now used by **hundreds of U.S. students**.
 - Built student workflows, authentication, push notifications, file handling, and backend API integrations.

[App Store](#) [Google Play](#)
- Self-Employed — Web Application Developer

JavaScript Vue Firebase REST APIs

 - Delivered **three client applications**, including **one product from concept through release**.
- [Alacrity](#) — IT Solutions Advisor

E-Commerce

 - Advised **more than 60 small businesses** on e-commerce and digital product decisions.
 - Supported an AI startup with product development and business planning.
- [SmartOne](#) — CTO & Lead Developer

Angular TypeScript

 - Owned technical planning, implementation, project delivery, and user interface design.

CRM

Customer relationship management system connected to SmartOne's point-of-sale platform. Led development from concept through release using Angular.

[View CRM — Merchant Portal](#)
- [FUIB](#) — Angular Front-End Developer

Angular TypeScript npm

 - Built a **reusable npm package** for the company user interface system across internal projects.
 - Maintained backend services for **financial processing infrastructure**.
